

LIVING THROUGH LEARNING

TRAINING OUR TEACHERS

On 10 March, founder Sonja Botha ignited the passion within our new teachers during a fun-filled afternoon of sharing knowledge and learning how to assist our learners to become literate! We would like to thank our donor, Coronation Funder Managers for providing a high-tech venue for this special event and our teachers for being there and wanting to excel.

"I have much more knowledge and ideas to implement in my class! I can use these new skills in life and teaching".
- Charissa Carter-Moses

"I gained a new understanding of the power of words. New ideas on how to teach reading and unpack "tricky words".
- Tayla Moses

SUCCESS STORIES

Amimah Sterris (Grade 1 - Levana Primary) started the year as an insecure little girl. She progressed very well with the help of the LTL programme. She is starting to read on her own and is putting sounds together to form words. She is helping her peers in class when they get stuck on their reading or with instruction.

Gia McCarthy (Grade 1 - Nooitgedacht Primary) struggled with finger spacing, formation and touching the lines. The educator did fine motor activities daily by letting the learners do tracing and exercising their fingers with the play dough. Handwriting was practiced on the white boards and the line charts. The educator made sure that the learner mastered this step before moving on to the workbooks. Photocopies of the letters were sent home to practice, she is improving wonderfully just by following these steps.

LTL is focused on PRODUCTIVITY in 2023. We at LTL believe that production and achieving efficiency only happen step by step. This is achieved with sustained dedication and hard work, determined focus on detail, and insistence on the highest standards of quality and performance. Our standard of delivery will continue in this manner throughout the year.
